SAP HANA SDA, SDI and SDQ

Course code: HA550

In this course, you will learn with regard to SAP HANA Data Provisioning how to use SAP HANA Smart Data Access to connect remote databases, to operate with SAP HANA Smart Data Integration for data replication and transformation and to execute data cleanup and enrichment with SAP HANA Smart Data Quality. Course based on software release: SAP HANA 2.0 SPS05.

Who is the course for

- Developer
- Data Consultant
- Solution Architect

What we teach you

This course will prepare you to:

- Use SAP HANA Smart Data Access to connect remote databases
- Use SAP HANA Smart Data Integration for data replication and transformation
- Use SAP HANA Smart Data Quality for data cleanup and enrichment

Required skills

Essential

- General knowledge about databases and software development.
- Overview knowledge about SAP HANA and the XS Advanced architecture.

Course outline

In this course you will learn how to:

- Use SAP HANA Smart Data Access to connect remote databases
- Use SAP HANA Smart Data Integration for data replication and transformation
- Use SAP HANA Smart Data Quality for data cleanup and enrichment
- The structure of the course is very much oriented to practice. The theoretical explanation is limited to the minimum and every lesson contains an exercise to be executed in the training system.
