

Adobe FrameMaker – Basic Course

Course code: ADOFRM1

The course is designed for regular users who want to use Adobe FrameMaker. Participants will understand the basic rules of creating documents, spreadsheets and anchoring graphics, will be familiar with the processes used in creation of technical documents, publications and printed materials. Adobe FrameMaker is a solution for the preparation of documents from unstructured, structured and XML content and publishing. The content is easily processed in an advanced user interface with tools based on industry standards. It is also possible to cooperate and make corrections or revisions and publish using Adobe FrameMaker Server into various channels including PDF, HTML and XML.
