IBM MQ V8 System Administration for z/OS

Course code: WM302G

This course provides the skills that are necessary to configure and manage an IBM MQ V8 queue manager on z/OS.Through lectures and hands-on lab exercises, you learn how to install, customize, operate, and administer IBM MQ V8. The course covers configuring a z/OS queue manager, setting up distributed queuing, IBM MQ clustering, IBM MQ on z/OS recovery and restart, security, and performance considerations. It also covers day-to-day administration and problem recovery. The hands-on lab exercises give you direct experience with IBM MQ V8 tasks such as defining and monitoring channels, configuring IBM MQ clusters, and problem determination activities.For information about other related courses, visit the IBM Training website: ibm.com/training.
