POWER BI Master Class – DAX and visualisation

Course code: PBIMC_REP

Do you already work in Power BI and look for a way to level up your game? Do you prefer creating visualizations and stunning reports rather than transforming data? Do you want your customers to get the maximum information and the right answers from your reports? Not sure how to do it? Take your Power BI skills with our Master Class focused on reporting to the next level. You will learn how to choose the right reporting artifacts in the Power BI service and how to effectively transfer data outputs to understandable stories using data story-telling techniques. You will master DAX so that any financial, time intelligence or decision-making function will become a zero problem for you! How quickly are your customers or colleagues navigate through reports and get the right answers out of them is up to you. Level up your Power BI skills with us.
