Zoner Photo Studio – a Comprehensive Study

Course code: ZPS

On this course you will get a comprehensive overview of all the possibilities of the editor and photo manager, which is popular among amateurs and professionals. You will start by downloading images from the camera and their organizations on your computer. You will understand the logic work with photos in Zoner Photo Studio, you will learn to use metadata, EXIF and GPS information, keywords, descriptions of the user, will learn the ability to search and sort, manage albums and archives. You will pay basic photo editing - adjusting brightness and contrast, removal of common errors, compared lines, cut-outs, reduction and enlargement. Then you will go on to more advanced methods - converting RAW format, complex color and brightness correction, photo retouching, creating and using selections and masks for editing, composing photographic collages, using creative filters and create 3D images, HDR and panoramic images. Finally, you will learn your creations export, print and share with friends on social networks or gallery Zonerama.

- module RAW

Getting images
- copy from device
- scanning
- screen capture
- download from the Web
- converting from RAW and DNG
- obtaining from a PDF

Organizing files
- folders
- albums
- CD compilation
- HTML albums
- sorting
- filtering , selecting
- comparing , sorting
- media archives

GOPAS®

Information about the images
- score
- tagging
- EXIF
- keywords
- user Information
- voice memo
- GPS coordinates
- digital signature
- format string
- import and export information
- managing information
- statistics

Batch operations with images
- multiple filter
- multiple assignment information
- batch renaming

Basic image editing
- rotate
- crop
- flip
- change the image size and canvas size

Image defect correction
- comparison of horizon
- comparison of lines
- comparison of perspective
- noise
- chromatic aberration
- vignetting
- barrel distortion
- deformation grid

Global image editing
- histogram
- automatic enhancement
- improve exposure
- adjustment of color temperature
- brighten and shadows
- levels
- curves

Local image editing
- red-eye reduction
- clone stamp
- iron tool
- healing brush

Selection tools

GOPAS®

- rectangle, ellipse
- lasso
- magic wand
- selection brush

Photomontage and collage
- text to image
- image to image
- transition filter
- effects
- editing layer

Painting
- fill
- brush
- eraser
- shapes
- effect brush

Final tuning of pictures
- sharpening
- frames

Publishing images
- presenting
- export to other formats
- print a single image
- index print
- print templates
- calendar
- HTML gallery
- panoramic images
- HDR images
- PDF projection
- 3D Images
- CDs, DVDs
- social networks
