

Leading SAFe®

Course code: SAFE_LEAD

During this course, attendees learn the importance of mastering Business Agility in order to thrive in the digital age and gain insights they can use to lead a Lean-Agile enterprise by leveraging the Scaled Agile Framework® (SAFe®). The course begins by exploring the SAFe principles, derived from Lean product development, Agile development, DevOps and systems thinking. Following this, the attendees will discuss how to establish Team and Technical Agility and organize around the flow of value. The course then focuses on the importance of adopting a customer-centric mindset and applying Design Thinking as part of the Agile Product Delivery core competency, and provides an opportunity to experience a PI Planning event. Due to the practical exercises on the course, the minimum number of participants is set at 6.
