

Microsoft Excel – Advanced Methods and Functions

Course code: MSEX3

Complete this course and get 90 days access to practice in e-learning version for free. You can choose the e-learning course in Czech, Slovak or English. This course is assigned for skilled Microsoft Excel users, who want to use special tools, techniques, methods and functions. You should already know Microsoft Excel on "Microsoft Excel - practical use" level. This course is suitable for users of every version of Microsoft Office products. Excel is a well-matured application and control of its interface has not changed significantly since the 2007 version. There will be current Excel version installed in the classroom.

Who is the course for

This course is assigned for skilled Microsoft Excel users, who want to use special tools.

What we teach you

You will learn all advanced techniques, methods and functions.

Required skills

Microsoft Excel - practical use

Course Outline

Conditions in formulas

- IF function, other logical functions
- CHOOSE function
- COUNTIF, SUMIF
- COUNTIFS, SUMIFS
- Functions available only in new versions of Excel

Database functions

- Criteria tables
- Kind of criteria
- Best practices

Lookup functions, joins of datasets

- VLOOKUP, HLOOKUP, XLOOKUP functions
- INDEX function
- MATCH function

Retrieving data from external databases

- Basic ways of external data importing in Excel
- Definition of datasource
- Configuration of external data range
- Import using PowerQuery addin

Datamodel

- Relations between Excel Tables
- Definition of Datamodel using PowerPivot addin (introduction to topic)
- Relation between datamodel and PivotTable (extension of PivotTable calculation power)

PivotTable reports

- Concept of PivotTables
- Aggregation functions, analytical calculations
- Additional calculations
- Calculated fields, ratio
- Data Consolidation using PivotTable
- Synchronized controlling of PivotTables group
