Oracle Database 12c R2: ASM Administration

Course code: D106023

This Oracle Database 12c: ASM Administration training teaches you about Oracle ASM architecture. Expert Oracle University instructors will help you develop a deeper understanding of both standard ASM and Flex ASM applications.

This Oracle Database 12c R2: ASM Administration training teaches you about Oracle ASM architecture. Expert Oracle University instructors will help you develop a deeper understanding of both standard ASM and Flex ASM applications. In this course, you will be introduced to Oracle Database Exadata Cloud Service.

Learn To:

Administer ASM files, directories, templates, and disk groups.

Manage and administer Oracle ASM File System and its components.

Gain an understanding of ASM New Features.

Gain an understanding of the Oracle Database Exadata Cloud Service.

Benefits to You

Ensure fast, reliable, secure and easy to manage performance. Optimize database workloads, lower IT costs and deliver a higher quality of service by enabling consolidation onto database clouds by learning about the Oracle Database 12c Grid Infrastructure, specifically Oracle ASM.

Course Objectives

Manage ASM instances and associated processes Monitor ASM using the V\$ASM dynamic performance views Manage Flex ASM Understand Flex ASM architecture and components Manage Flex ASM Disk Group Create and delete Automatic Storage Management (ASM) disk groups Employ ASM space management techniques Set the attributes of an existing ASM disk group Perform ongoing maintenance tasks on ASM disk groups Explain key performance and scalability considerations for ASM disk groups Use different client tools to access ASM files Describe the format of a fully qualified ASM file name Describe the Automatic Storage Management (ASM) architecture Describe the components of ASM Understand ASM Deployment Alternatives Explain and apply Automatic Storage Management (ASM) initialization parameters
