Course code: AWSDSS

Who is the course forDevelopers who have some familiarity with serverless architecture and experience with development in the AWS Cloud.
What we teach you   Apply   event-driven best practices to a serverless application design using   appropriate AWS services   Identify   the challenges and trade-offs of transitioning to serverless development, and   make recommendations that suit your development organization and   environment   Build   serverless applications using patterns that connect AWS managed services   together, and account for service characteristics, including service quotas,   available integrations, invocation model, error handling, and event source   payload   Compare   and contrast available options for writing infrastructure as code, including   AWS CloudFormation, AWS Amplify, AWS Serverless Application Model (AWS SAM),   and AWS Cloud Development Kit (AWS CDK)   And   much moreRequired skills·   Familiarity with the basics of AWS Cloud architecture
·   An understanding of developing applications on AWS equivalent to completing the Developing on AWS classroom training
·   Knowledge equivalent to completing the following serverless digital trainings: AWS Lambda Foundations and Amazon API Gateway for Serverless Applications

Who is the course for

Developers who have some familiarity with serverless architecture and experience with development in the AWS Cloud.

What we teach you

- Apply event-driven best practices to a serverless application design using appropriate AWS services
- Identify the challenges and trade-offs of transitioning to serverless development, and make recommendations that suit your development organization and environment
- Build serverless applications using patterns that connect AWS managed services together, and account for service characteristics, including service quotas, available integrations, invocation model, error handling, and event source payload
- Compare and contrast available options for writing infrastructure as code, including AWS CloudFormation, AWS Amplify, AWS Serverless Application Model (AWS SAM), and AWS Cloud Development Kit (AWS CDK)
- And much more

Required skills

·   Familiarity with the basics of AWS Cloud architecture
·   An understanding of developing applications on AWS equivalent to completing the Developing on AWS classroom training
·   Knowledge equivalent to completing the following serverless digital trainings: AWS Lambda Foundations and Amazon API Gateway for Serverless Applications
