

Microsoft 365 - configuration and use of SharePoint Premium

Course code: GOC245

Who is the course for The course is designed for SharePoint Online administrators who want to expand their knowledge of SharePoint Premium features and services. It is also suitable for IT professionals who manage or plan to manage an enterprise-level SharePoint Online environment

What we teach you Configure and manage the new features of SharePoint Premium

Optimize performance and take advantage of advanced SharePoint Online management functions

Use advanced features for collaboration and content management such as document processing, automatic data completion, content compilation, content tagging, translations, eSignature, OCR, Microsoft 365 Archive, or Microsoft 365 Backup

Integrate SharePoint Premium with other Microsoft 365 services

Required skills Knowledge of the range of courses listed in the Previous Courses and Related Courses sections

Basic knowledge of SharePoint Online administration

Ability to work in the Microsoft 365 environment and basic knowledge of PowerShell

tools Basic understanding of content management and collaboration technologies

Teaching methods Expert explanation with practical examples, separate exercises on virtual computers on the Hyper-V, Microsoft Azure and Microsoft 365 platforms

Independent practical exercises usually take up at least a third of the time spent on the course

Study materials GOPAS own student materials in electronic or printed form

Course Outline A brief look at the history of SharePoint

Explanation of how Microsoft 365

services work SharePoint Online and SharePoint Embedded

An overview of SharePoint Premium and its key features.

Configuring SharePoint Premium.

Scripting tools for SharePoint Online

Download Blocking Policies

Change History

Conditional Access

Data access reports

Microsoft Clarity

Sensitivity labels

Website Lifecycle Management

Introduction to Content Types

Predefined content processing

Freestyle content processing

OCR

Introduction to Managed Metadata Technology

Automatic tagging

Autofill and configuration of forms

Automatic creation of documents

Website life cycle

Document life cycle

Use of SharePoint Premium together with other MS365 services

Preparation for certification exams For Microsoft certification exams, apart from MCM certifications, participation in the official MOC course is not a necessary condition for passing the exam

Microsoft's official MOC courses as well as our own GOC courses are a suitable part of the preparation for Microsoft certification exams such as MTA, MCP, MCSA, MCSE, or MCM

However, the primary goal of the course is not directly preparation for certification exams, but the mastery of theoretical principles and the acquisition of practical skills necessary to work effectively with the given product

Microsoft 365 - configuration and use of SharePoint Premium

MOC courses usually cover almost all the areas required for the corresponding certification exams. However, their discussion in the course is not always given exactly the same time and emphasis as required by the certification exam. For example, books from MS Press (the so-called Self-paced Training Kit) and electronic self-test software can be used as additional preparation for certification exams.
