Adobe Acrobat – interactive PDF documents

- articles
- tree model
- dags, content

Accessibility, tags, and reflow

- accessibility features
- check the accessibility of PDF
- reading PDF with reflow and accessibility
- creating accessible PDF
- edit existing PDF accessibility
- editing document structure using the tabs Content and Tags

Create a form

- converting an existing electronic document to PDF form
- scan a paper document and convert it to PDF form

Form Settings

- form preferences
- enable saving form data for users of Adobe Reader

Form fields

- text field
- check box
- toggle button
- a list box
- combo box
- button
- digital signature
- barcode

Formating the form fields

- select multiple form fields , layout and copy
- changing the size and layout of form fields
- setting navigation between form fields

The behavior of the form fields

- edit the properties of form fields
- redefining the default property values of form fields
- data validation
- calculations in fields

Collecting and managing form data

- collect data from users
- collecting data from a form
- adding data from users to an existing answer file
- export data from users of the response file
- monitor forms
