## Microsoft 365 - computer management with Group **Policy and Intune**

### Course code: GOC228

Pětidenní kurz seznamuje účastníky detailně s možnostmi správy Windows stanic, mobilních zařízení a serverů jak pomocí on-prem Active Directory Group Policy (GPO), pomocí cloudového Intune i pomocí PowerShell.

### For whom the course is intended

The course is intended for administrators and architects of security and IT infrastructure primarily built on Active Directory (AD DS) and Azure Active Directory (AAD) or Entra ID (EntraID) Assumed entry knowledge

Knowledge in the range of courses listed in the sections Previous courses and Related courses

Good knowledge of TCP/IP and DNS

technologies

Course outline Introduction to the technologies of central management of cloud and on-prem clients and servers Intune, Azure, Entra ID and Active Directory Connecting clients to Active Directory (domain join) Management of computers using Group Policy (GPO) Basics and principles of functioning of GPO GPUPDATE and GPUPDATE /force Administrative templates (administrative templates, ADMX) Security policy and Windows Firewall Filtering and applying GPOs above the OU hierarchy Security filters and groups (security filtering) User policies and settings Group Policy Preferences and their options and item filtering Loopback processing WMI filtering Scripting and automation for Group Policy Monitoring and troubleshooting Group Policy Backup, restore and GPO transfers and migrations BitLocker and its management Overview of Intune, Azure, Azure Active Directory (AAD) or Entra ID (EntraID) Connecting clients to Azure AD (Entra ID) and hybrid scenarios with on-prem Active Directory Domain Services (ADDS) Entra ID registration (WPJ), Entra ID join (AADJ), hybrid Entra ID join (DJ++) Synchronization of user accounts and computers (devices) from on-prem ADDS to Entra ID (AAD, EntraID) using Azure AD Connect (AAD Connect, Entra ID Connect)

Controlling who can connect computers to AAD/EntraID

Windows Autopilot and hardware hash collection from the device

# Microsoft 365 - computer management with Group Policy and Intune

Management of options for connecting computers to Intune/MDM Connecting Windows computers to Intune (MDM enrollment) Use of Windows Autopilot, autoenrollment and provisioning packages technology Management of Windows computers using Intune - configuration profiles Management of Windows computers using Intune - scripts and PowerShell Management of Windows computers using Intune - BitLocker Management of Windows computers using Intune - Windows Firewall Management of Windows computers using Intune - LAPS (Local Admin Password Solution) Scripting and automation in Intune and Intune itself Monitoring and troubleshooting Intune reports, diagnostic logs and CSP (Configuration Settings Provider) Device compliance (compliance) Scripts for compliance and PowerShell Installing applications from the Microsoft Store Installing applications from MSI Installation of applications from EXE and BAT and PowerShell Hybrid management using Group Policy and Intune Group Policy Analytics tool Device disposal - remote wipe, retire, clean start, sysprep Preparation for certification exams For Microsoft certification exams, apart from MCM certifications, participation in the official MOC course is not a necessary condition for passing the exam

Microsoft's official MOC courses as well as our own GOC courses are a suitable part of the preparation for Microsoft certification exams such as MTA, MCP, MCSA, MCSE, or MCM

However, the primary goal of the course is not directly preparation for certification exams, but the mastery of theoretical principles and the acquisition of practical skills necessary to work effectively with the given product

MOC courses usually cover almost all areas required for the corresponding certification exams. However, their discussion in the course is not always given exactly the same time and emphasis as required by the certification exam For example, books from MS Press (so-called Self-paced Training Kit) and electronic self-test software can be used as additional preparation for certification exams.
