

Building SAS® Studio Flows in SAS® Viya®

Course code: VSTU1C

This course is for users who do not have SAS programming experience but need to access and prepare data, and present summarized results. This course focuses on using flows, a point-and-click tool in SAS Studio that visualizes data transformation processes.

Who is the course for

Business analysts who would like to get started using SAS Studio in SAS Viya to access, prepare, and analyze data

What we teach you

- Access and manipulate data of various types
- Create queries that filter and sort data, compute new columns, and join multiple tables
- Create dynamic summary reports

Required skills

No SAS experience or programming experience is required, although you should have some computer experience

Course outline

Getting Started

- Introducing SAS Studio
- SAS Studio flows

Accessing Data

- Understanding SAS data
- Accessing data through libraries
- Importing data

Transforming and Analyzing Data

- Creating simple queries
- Using SAS Studio Analyst steps
- Creating results with tasks
