

SAS® Enterprise Miner™ Integration with Open Source Languages

Course code: AEMOSI

This course introduces the basics for integrating R programming and Python scripts into SAS and SAS Enterprise Miner. Topics are presented in the context of data mining, which includes data exploration, model prototyping, and supervised and unsupervised learning techniques.

Who is the course for

Analysts who use both Enterprise Miner and open source software

What we teach you

- integrate R packages in SAS Enterprise Miner
- leverage Python scripts in SAS Enterprise Miner

Required skills

Some knowledge of SAS Enterprise Miner is helpful but not required

Course outline

- basics of open source software
- model building in SAS Enterprise Miner R
- introduction to R
- using R in SAS Enterprise Miner Python
- introduction to Python
- running a random forest in Python
