Exchange - advanced implementation and design

Course code: GOC232

Five-days instructor led training extends Exchange administration skills and also brings topics on design of complex and hybrid deployments with cloud infrastructures.

Prerequisities

Knowledge in extent of the courses which are listed in the bellow sections Previous Courses and Related Courses Good understanding of TCP/IP and DNS technologies Course outline New features in Exchange Server Gathering business requirements for an Exchange Server deployment Planning for an Exchange Server deployment Designing a Unified Messaging (UM) deployment Planning Exchange Server hardware requirements Planning Exchange Server for virtualization and Microsoft Azure integration Planning and implementing public folders Designing message routing Designing transport services Designing the message-routing perimeter Designing and implementing transport compliance Planning for Exchange Server clients Planning for client access Planning and implementing Office Online Server Planning and implementing coexistence of SharePoint with Exchange Designing external client access Planning high availability for Exchange Server Planning for load balancing Planning for site resilience Using Managed Availability to improve high availability Implementing DSC Planning messaging security Designing and implementing AD RMS and Azure RMS integration Overview of messaging records management and archiving Designing In-Place Archiving Designing and implementing message retention Designing and implementing data loss prevention Designing and implementing In-Place Hold Designing and implementing In-Place eDiscovery GOPAS Praha GOPAS Brno **GOPAS Bratislava GOPAS** Kodaňská 1441/46 Nové sady 996/25 Dr. Vladimíra Clementisa 10 101.00 Praha 10 602 00 Brno Bratislava, 821 02 Tel.: +420 234 064 900-3 Tel.: +420 542 422 111 Tel.: +421 248 282 701-2 Copyright © 2020 GOPAS, a.s.,

Designing and implementing federation Designing coexistence between Exchange organizations Designing and implementing cross-forest mailbox moves Planning an upgrade from previous Exchange Server versions Implementing the upgrade from previous Exchange Server versions Basics of a hybrid deployment Planning and implementing a hybrid deployment Implementing advanced functionality for hybrid deployments

Preparation for Microsoft certification

Most Microsoft certification exams do not require students to attend an official MOC course in order to pass the exam. This applies to all certifications except for MCM Official Microsoft MOC courses as well as our own GOC courses are good ways of preparation for Microsoft certifications such as MCP, MTA, MCSA, MCSE or MCM This does not mean that official MOC courses would serve as the only necessary praparation. The primary goal of an MOC course is to provide for sufficient theoretical knowledge and practical experience to effectively work with the related product

MOC courses usually cover most of the topics required by their respective certification exams, but often do not give every topic the same amount of time and emphassis as may be required to completelly pass the exam
