

Introduction to Programming with ABAP

Course code: BC100

By the end of this course you should be able to handle the basics of ABAP Programming. Course based on software release: SAP NETWEAVER 7.50 ECC608.

Who is the course for

- Developer
- Developer Consultant
- Help Desk / COE Support

What we teach you

- Learn simple ABAP code
- Trace the flow of a program and troubleshoot simple problems

Course outline

- Basics of ABAP Programming
- Developing a Simple ABAP Program
- Introducing ABAP Syntax
- Implementing a Simple Dialog
- Customizing the ABAP Editor
- Coding and Debugging in ABAP
- Defining Simple Variables
- Defining Text Symbols Performing Arithmetic Operations Using Simple Variables
- Using System Variables
- Debugging a Program
- Creating an ABAP List
- Processing Character Strings
- Control Flow Structures in ABAP
- Implementing Conditional Logic
- Implementing Loops
- Runtime Errors and Error Handling
- Analyzing Runtime Errors
- Implementing Error Handling
- Additional ABAP Programming Techniques
- Retrieving Data From the Database
- Describing Modularization in ABAP
- Using Function Modules

What you need to know

- The BC400 (ABAP Workbench Foundations) programming courses require that you understand the content of this basic course.
