

Adobe Photoshop – Retouching, Masking and Photomontages

Course code: PSH10

In the first part of this course you will learn how to use Adobe Photoshop for working with tonality in the original photograph, use it to create special alpha channel and then masks. These techniques allow you to mask the seemingly impossible – transparent, semi-transparent and blurred objects or often remembered hair. Masks can then be used in creating advanced photomontage and collage. In the second part of the course you will learn how to adjust skin tones for portrait on the desired color, remove minor defects and imperfections, brighten portrait, eliminate glare caused when shooting. Other discussed techniques will be changing and adjustment of certain body proportions, whitening the whites of the eyes and other common requirements of advertising agencies. All this will be done using layers, masks and blending modes.

| Affiliate | Duration | Course price | ITB |
