

Agile methods and Scrum process – Master Of Agile

Course code: SCRUM2

Would you like to learn more about Agile methods and Scrum process?

Course provide an extended education of Agile methods and Scrum process. It's great next step for managers, ScrumMasters, Product Owners and team members who want to shift their Agile transformation to the next level and make it truly successful.

You will try new practices and methods extending the core Agile and Scrum framework. This workshop is a great base to adopt Agile at your organization or team.

This workshop is also covering the core scaling principles, which helps you to apply Scrum to bigger organizations and projects. Going Agile, is not about the technology and particular project specifics, but more about the willingness to accept new ideas, new way of doing things and readiness to change. Course is designed as an interactive workshop and the participants will directly try the discussed principles. As Agile methods are about the principles which may vary between the companies, teams and projects; the course will cover real case-studies from different business and company cultures as well.

The course is also recommended as an extension to certification ICAgile Certified Professional (ICP), Certified Scrum Master (CSM), and Certified Scrum Product Owner (CSPO).

The workshop is facilitated by experienced trainers, who are certified by the most well known Agile and Scrum certification authorities. They are approved as trainers of ICAgile a are certified by the Scrum Alliance: CSM - Certified Scrum Master, CSPO - Certified Scrum Product Owner, a CSP - Certified Scrum Professional.
