Who is the course for

Each student will have a dedicated workstation to complete the numerous practical exercises. Sample solutions will also be provided.

What we teach you

After completing this course, the student should be able to:

Use address pointers and user spaces in RPG IV programs

Write database triggers in RPG IV

Develop ILE modular objects and package them in service programs

Explain the purpose of ILE Activation Groups

Explain the behavior of Error Handling and Percolation in ILE

Code an ILE Error Handling program

Call iSeries APIs from RPG IV programs

Describe how to use CGI in RPG IV for web applications

Required skills

Before attending this course, the student should be able to:

Code subfile-processing programs in RPG IV

Employ error-handling features of the RPG IV language

Describe the basic concepts of ILE and modular program design

Use free-format coding techniques

Write date-processing routines which employ built-in functions

Course Outline

Basic API Programming

RPG IV Features

Leveraging DB2 UDB Database Features
