Prerequisities

Knowledge in extent of the courses which are listed in the bellow sections Previous Courses and Related Courses

Good understanding of TCP/IP and DNS technologies

Course outline

Overview of web technologies

HTTP protocol and its security using HTTP encryption by TLS

Essential HTTP headers

Web proxy servers and application HTTP firewalls

Browser identification, language customization, IP addresses etc.

Web servers with static content

Application web servers with dynamic content such as ASP.NET, Java, ASP, PHP etc.

Principles and basics of JavaScript dynamic web content in browser clients

Methods of GET, POST, HEAD requests and their differences and security properties, form upload (post-back)

Error states, redirects

Session cookies and persistent cookies, their security and other properties

Same-origin policy of HTML elements such as pictures, scripts, cookies, iframes etc

Intro into first-party and third-party cookies, their blocking and privacy (GDPR)

Forms-base (cookied-based) authentication and its common implementations

Troubleshooting HTTP communications with Fiddler proxy

Networking - basic and security of web technologies

Developper tools integrated into web browsers Other HTTP authentication methods such as basic or windows and SAML Security and other properties of TLS/HTTPS certificates and protecting communications Principles, functionality and configuration of TLS protocol in Windows and in browsers Basic principles of web application security and their development Modern protection technologies such as HSTS or X-Frame-Options Overview of essential web attacks such as XSS or CSRF/XSRF

Preparation for Microsoft certification

Most Microsoft certification exams do not require students to attend an official MOC course in order to pass the exam. This applies to all certifications except for MCM Official Microsoft MOC courses as well as our own GOC courses are good ways of preparation for Microsoft certifications such as MCP, MTA, MCSA, MCSE or MCM This does not mean that official MOC courses would serve as the only necessary praparation. The primary goal of an

MOC course is to provide for sufficient theoretical knowledge and practical experience to effectively work with the related product

MOC courses usually cover most of the topics required by their respective certification exams, but often do not give every topic the same amount of time and emphassis as may be required to completelly pass the exam
