Innovative Logistics Processes in SAP S/4HANA Enterprise Management

Course code: S4LG1

In this course the key logistical business processes are discussed that can be found within SAP S/4HANA Enterprise Management. Demand planning, material requirements planning and (embedded) SAP S/4HANA Production Planning and Detailed Scheduling are discussed. There is also focus on the execution processes: external procurement and inventory management, (discrete) production, (embedded) SAP Extended Warehouse Management, order fulfillment and (embedded) SAP Transportation Management. Real- time analytics and possible conversion scenarios are also discussed. Course based on software release: SAP S/4HANA 2022.
