

Introduction to Application Programming on SAP S/4HANA

Course code: S4DEV

This course provides participants with an overview of the ABAP RESTful Application Programming Model (RAP). The goal is to create an SAP Fiori app touching every area needed to develop and deliver this app to the SAP Fiori launchpad. After a short introduction to SAP S/4HANA and SAP Fiori, the first step is to create CDS projection views on top of existing data model views using the ABAP Development Tools (ADT). Exposing the CDS projection views as a business service makes it possible to consume the model data in a SAPUI5 app, which is built using SAP Fiori elements. Using the behavior of a RAP business object, transactional processing is enabled in the app. Determinations, validations and actions are also added through this. As additional functionality draft-support and value helps are implemented. To make the app available in the SAP Fiori launchpad, catalogs with tiles and target mappings are created. Course based on software release: SAP S/4HANA 2021, ABAP Platform 2021, AS ABAP 7.56, SAPUI5 1.96, SAP Business Application Studio.

Who is the course for

- Developers
- Development Consultants

What we teach you

This course will prepare you to:

- Understand the principles of SAP S/4HANA and SAP Fiori
- Discover and use the ABAP RESTful Application Programming Model
- Implement and provide basic apps based on SAP Fiori elements

Required skills

Essential

- BC100 or equivalent programming knowledge

Recommended

- S4D400

Course outline

- Foundation
- Exploring SAP S/4HANA
- Exploring SAP Fiori
- Data Modeling
- Working with ABAP Development Tools
- Exploring ABAP Core Data Services
- Creating CDS Views
- Data Service
- Exploring Business Services
- Working with Business Services
- User Interface

Introduction to Application Programming on SAP S/4HANA

- Developing SAP Fiori UIs
- Consuming business data using SAP Fiori elements
- Working with the SAP Business Application Studio
- Application Provisioning
- Exploring SAP Fiori launchpad configuration
- Configuring target mappings
- Transactional Processing
- Enabling change operations and draft capabilities using RAP Business Object Behavior
- Exploring Determinations, Validations and Actions
- Adding Value Help
