- OCR
- Introduction to Managed Metadata Technology
- Automatic tagging
- Autofill and configuration of forms
- Automatic creation of documents
- Website life cycle
- Document life cycle
- Use of SharePoint Premium together with other MS365 services

## Preparation for certification exams

For Microsoft certification exams, apart from MCM certifications, participation in the official MOC course is not a necessary condition for passing the exam

Microsoft's official MOC courses as well as our own GOC courses are a suitable part of the preparation for Microsoft certification exams such as MTA, MCP, MCSA, MCSE, or MCM

However, the primary goal of the course is not directly preparation for certification exams, but the mastery of theoretical principles and the acquisition of practical skills necessary to work effectively with the given product

MOC courses usually cover almost all the areas required for the corresponding certification exams. However, their discussion in the course is not always given exactly the same time and emphasis as required by the certification exam

For example, books from MS Press (the so-called Self-paced Training Kit) and electronic self-test software can be used as additional preparation for certification exams
