

# Python II - advanced techniques

Course code: PYTHON\_ADV

The course is designed for all programmers who have programming experience in Python at the PYTHON\_INTRO course level. In the course, you will learn more advanced elements of the language such as OOP, using generators and iterators, Lambda expressions, anonymous functions, decorators, JSON and many other practical and necessary topics for Python developers.

| Affiliate  | Duration | Course price | ITB |
|------------|----------|--------------|-----|
| Praha      | 5        | 23 000 Kč    | 50  |
| Brno       | 5        | 23 000 Kč    | 50  |
| Bratislava | 5        | 1 000 €      | 50  |

The prices are without VAT.

## Course terms

| Date                | Duration | Course price | Type     | Course language | Location                   |
|---------------------|----------|--------------|----------|-----------------|----------------------------|
| <b>G</b> 17.02.2025 | 5        | 23 000 Kč    | Presence | CZ/SK           | Gopas Praha Prezenční      |
| 17.03.2025          | 5        | 23 000 Kč    | Presence | CZ/SK           | Gopas Brno Prezenční       |
| 31.03.2025          | 5        | 23 000 Kč    | Presence | CZ/SK           | Gopas Praha Prezenční      |
| 07.04.2025          | 5        | 1 000 €      | Presence | CZ/SK           | Gopas Bratislava Prezenční |
| 19.05.2025          | 5        | 23 000 Kč    | Presence | CZ/SK           | Gopas Praha Prezenční      |
| 02.06.2025          | 5        | 23 000 Kč    | Presence | CZ/SK           | Gopas Brno Prezenční       |
| 09.06.2025          | 5        | 23 000 Kč    | Online   | CZ/SK           | Gopas Praha Online         |
| 09.06.2025          | 5        | 1 000 €      | Online   | CZ/SK           | Gopas Bratislava Online    |

The prices are without VAT.

## For whom the course is intended:

- Programmers who have programming experience in Python at the PYTHON\_INTRO course level
- Experienced developers who have experience with other programming languages and want to switch to Python. In this case, it is advisable to familiarize yourself with at least the complete basics of the language in advance.

## Required entry skills

- Basic knowledge of Python at the level of the PYTHON\_INTRO course

## Teaching methods

- Expert interpretation with practical examples, exercises on computers.

## Studying materials

- Presentation of the material discussed in printed or online form.

## Syllabus

A quick recap of Python basics

- History and basic features of Python
- Installation and development environment
- Using multiple versions of CPython
- Pure function and variable scope
- Mutability and immutability of objects
- Using collections

# Python II - advanced techniques

- Use of \*args and \*\*kwargs

## Collection Comprehensions

- Set Comprehensions
- Set Comprehensions
- Dictionary Comprehensions

## Modules, packages and distribution of applications (modules and packages)

- Objects, Namespaces and Scope
- Modules
- Packages
- Virtual Environment (external)
- Using Pip
- Freezing
- Using PyPi
- Packaging and Distribution

## PPE techniques

- Class o object
- Using self
- Instance methods
- Class methods
- Static methods
- Inheritance, polymorphism
- Properties
- An object like a dictionary

## Error Handling

- Exception handling
- Raising Custom Exception

## Generators and Iterators

- Iterators, iterables and sequences
- Magic function
- **iter**
- {}
- Magic function
- **next**
- {}
- Custom iterable class
- Generator function
- yield return

## Fundamentals of functional programming in Python

- Nested functions
- Functions as an object
- Keyword non-local
- Closures
- Anonymous / Lambda functions

## Magic methods

- String Conversion
- Arithmetic Operations
- Comparison Operations

# Python II - advanced techniques

- Conversion

## Decorators

- Built-in Decorators
- Standard library Decorators
- Custom Decorators

## Resources and Persistent Storage

- Work with resources (try / finally)
- Context manager and magic methods
- **enter**
- and
- **exit**
- Working with files (read, write)
- Working with Python pickle formats,
- Key-value database shelf
- JSON, CSV, XLSX
