

Developing Windows Applications with WPF

Course code: DOTNET_WPF

This course is designed for developers on the .Net platform who want to learn the techniques of programming WinForms and Windows Presentation Foundation (WPF) applications using Visual Studio.

| Affiliate | Duration | Course price | ITB |
|------------|----------|--------------|-----|
| Praha | 5 | 23 000 Kč | 50 |
| Brno | 5 | 23 000 Kč | 50 |
| Bratislava | 5 | 1 000 € | 50 |

The prices are without VAT.

Course terms

| Date | Duration | Course price | Type | Course language | Location |
|--|----------|--------------|--------------|-----------------|--------------------------------|
|  24.03.2025 | 5 | 23 000 Kč | Telepresence | CZ/SK | Gopas Praha Prezenční_GTT |
|  24.03.2025 | 5 | 23 000 Kč | Telepresence | CZ/SK | Gopas Brno Prezenční_GTT |
|  24.03.2025 | 5 | 1 000 € | Telepresence | CZ/SK | Gopas Bratislava Prezenční_GTT |

The prices are without VAT.

Required input knowledge

- Experience with c # programming at GOC2125 level is assumed
- Development experience with Visual Studio
- Experience with object-oriented programming in C #
- Experience with LINQ technology

Teaching methods

- Expert explanation with practical examples, exercises on computers

Course syllabus

Module 1 Windows application and WPF

- Application architecture for Windows
- Interoperability between Windows Forms and WPF

Module 2 Introduction to Visual Studio and WPF

- Basics of creating WPF applications in Visual Studio
- Basic elements of a common WPF application
- Stand-alone vs. browser-based (XBAP) WPF application

Module 3 UI user interface design and development

- Create Page Layout
- Use of Content Controls
- Use Items Controls
- What are Resources and how they are used

Module 4 User Interface

- Create consistent UI help styles
- Change the appearance of elements using templates
- Event Processing and Infrastructure Commands

Module 5 Unit Testing and Debugging

GOPAS Praha

Kodaňská 1441/46

Developing Windows Applications with WPF

- WPF application testing strategy
- XAML debugging
- Processing Uncaptured Exceptions

Module 6 Simple Data Binding and Validation

- Basics of WPF Data Binding
- Create Data Binding
- Implementation of Property Change Notification
- Data conversion
- Data validation
- Design-time data display

Module 7 Data Binding on Collections

- Binding on a collection of objects
- Working with the ObservableCollection object
- Loading data from SQL Server database using Entity Framework and LINQ
- Use of Data Templates

Module 8 UI Behavior Improvements

- Implementation of asynchronous processing
- UI implementation with fast response
- Working with the Task class
- Use the keywords async and await

Module 9 Localization and help for application users

- Localization and Globalization
- Implementation of User Assistance Features
- Ensuring User Accessibility Features

Module 10 WPF 2D graphics, multimedia and printing

- 2D graphics
- View images
- Add multimedia to WPF application
- Create and print documents

Module 11 Creating custom elements

- Basics of creating elements for WPF
- Create User Controls
- Create Custom Controls
- Control the appearance of elements using Visual States

Module 12 Attached Properties and Behaviors and WPF

- Implementation of Attached Properties
- Implementation of Expression Blend Behaviors, Triggers and Actions

Module 13 Animation in WPF

- Creating animations
- Use triggers
- Implementation of data visualizations

Module 14 Application class and application settings

- Application class
- Create and use application settings
- Application lifecycle

Module 15 WPF application configuration and distribution
